

Evolia is a Belgian consultancy company.

Our main goal is providing technical and intellectual expertise to projects in the following sectors: infrastructure, energy, industry, construction and life sciences.

Thanks to our depth market knowledge, we can proceed on each step of the project from the request until the delivery.

In order to satisfy the continuous and growing request we are seeking to strengthen our consultancy team, with a

PROJECT ENGINEER

As a project engineer you are responsible for several parts of the installations. You assure an accurate & timely completion of materials, appliances and installations.

Main tasks

During the engineering stage you make the technical design of your scope in close collaboration with engineers from other teams such as process, mechanical design, automation, E&I,

You remain in close contact with suppliers, subcontractors and partners in order to make a solid technical analysis of the offers.

You draft specifications for the delivery and construction activities of materials on site.

In collaboration with Quality Control Engineers you will create Inspection and Test Plans. Next to that you assure a strong follow up on suppliers.

You help the Site Manager or other colleagues during construction and commissioning activities regarding issues and challenges.

Finally you gather, control and keep the technical documents up to date.

Ideal profile

Combines a higher degree in Engineering with a few years of experience in project engineering, or project management in machinery, heavy industries, process equipment, bulk handling systems, steel structures,

Is fluent in English and ideally speaks Dutch and French

Is willing to make short business trips to suppliers or on site activities

Strengths

In order to draft faultless technical documentation and analyse technical offers you work accurately & detail-oriented

You love to work together with colleagues from several teams and are a good communicator.

Organizing and planning work and projects is your second nature. This way you keep an overview and reach deadline

Our offer

You will receive a permanent contract with competitive salary with extra-legal benefits:

- company car with fuel card,
- communication, representation allowance,
- mobile, internet@home,
- hospitalization and group insurances,
- 20 holidays and 12 compensatory days,
- continuous training.
